## Experience

---

### Self-Employed

2011 – Present

#### FREELANCE CONTRACTOR

Orlando, FL

- Provide services including: software development, web development, database administration, process analysis / automation, data scraping / analysis, multimedia design, and programming lessons.
- Work closely with clients to ensure project quality by gathering requirements and analyzing user feedback on an ongoing basis throughout the software development lifecycle.
- Collaborate with remote teams, providing specifications and ongoing guidance to ensure seamless integration of custom software solutions, adherence to project timelines, and alignment with client objectives.

### IBM

2006 – 2010

#### SERVICE TECHNICIAN

Mount Laurel, NJ

- Completed 40+ system modernization projects; performing installation and configuration of networks, servers, workstations, and system images.
- Provided continuous on-site network, deskside, and software support at client business offices; maintaining overall employee systems at 99.9% uptime.
- Performed ad-hoc installation and servicing of network, workstation, software, and point-of-sale systems at client retail locations.
- Client base consisted of various Fortune 100 businesses such as:  
Merrill Lynch, Morgan Stanley, Johnson and Johnson, Walmart, Best Buy, and Ford Motor.
